- New Delhi, India

About

Class 11 student and solo developer based in New Delhi, building scroll-driven 3D web experiences, AI-powered systems, and full-stack products end to end. Works across systems programming, robotics, and applied AI/ML, with documentation-first habits and architecture planned before code, and shipped over prototyped. Also delivers freelance web development for production clients.

Stack

- React
- TypeScript
- Three.js
- Framer Motion
- FastAPI
- Python
- Next.js
- Node.js
- C17
- Firebase
- Gemini / Claude API
- Tailwind
- Docker

Flagship Builds

selected work

AEGIS: Decision Intelligence Platform

GOOGLE GEN AI ACADEMY · APAC

5-agent graph (Orchestrator to Narrative) on ADK 2.0 + BigQuery turns fragmented city-ops data into a cited Situation Brief, streamed live via React Flow.

ADK 2.0

BigQuery

Gemini 3

React Flow

SMRITI: Knowledge Debt Intelligence

ET HACKATHON · PHASE 2

Quantifies unwritten technician knowledge loss as a score, forecasts asset criticality, and flags flight-risk experts before they walk out the door.

FastAPI

Gemini 2.0

WebSockets

R3F

MahinaOS: From-Scratch Linux OS

PHASE 3 · IN PROGRESS

Custom PID-1 init, framebuffer boot splash, a bespoke display protocol (LGP), and a native C17 GUI toolkit, built after the architecture was documented.

C17

Linux Kernel

Limine

QEMU

Veronica: Sovereign AI

V7.2

System-level perception, Whisper STT, BLIP vision, and a persistent memory graph mapping real contacts across WhatsApp and email. Local-first, cloud-scalable.

FastAPI

Ollama

Whisper

BLIP

More Builds

Vectoris: Project Intelligence Workspace

A workspace built for electrical and construction estimating teams, helping project managers with documentation audits, spec rewrites, and implementation prompts for Antigravity, an in-house AI agent.

[Documentation Audits](#)[Spec Rewrites](#)[AI Agent Prompts](#)

Sunad OTT + Sunad Store: Indian Civilizational Commerce & Streaming

Bilingual (Hindi/English) streaming platform and an ODOP artisan marketplace: Next.js 14 on Vercel edge, a separate Express/TypeScript API, Firebase + Firestore, Razorpay webhooks, a real split-service architecture instead of a monorepo demo.

[Next.js 14](#)[Express](#)[Firestore](#)[Razorpay](#)

STEM Idea Generator (Veronica-powered)

Agentic builder platform for student STEM projects; audited to SaaS-readiness with per-user quotas, key rotation, and CI wired in.

[FastAPI](#)[React](#)[Supabase](#)[OpenRouter](#)

SWARMOS: Heterogeneous Swarm Robotics

Air-and-ground swarm robotics system with a custom Autonomous Strategy Engine, built and fielded for national-level robotics competition.

[Robotics](#)[Python](#)[Strategy Engine](#)

How I Work

- Documentation before code: specs get written before a line is shipped.
- Architecture diagrams aren't decoration, they're used to think, not just to explain after.
- Say when something's a prototype, rather than fake a polished demo.
- Iterate in public version numbers, nothing here is a one-shot build.

Background

- Class 11 student, New Delhi, India
- NCC cadet, also plays cricket & football
- Freelance web development for production clients
- Building tools for the construction and estimating industry

Currently Building

- MahinaOS Phase 3, shell polish and local AI daemon
- Extending Veronica's omni-connector layer
- Applied to PRAYAAS (NCERT national research grant)

Available for freelance projects and long-term contracts
